

# Pathway to a PhD - PART I

## Get Paid to Get a PhD!

This workshop will cover how PhD programs work, funding and a preparation timeline, including when to take the GRE, writing your personal statement, research statement & CV; discussion on career pathways that open up to PhD recipients, including current average salaries in academia, industry, and government, reaching out to faculty who you're interested in doing your PhD with; volunteering/working in a research lab as early as possible; and undergraduate research training programs on campus that are here to support students.

Facilitated by:  
Dr. Erin McCauley,  
Department of Chemistry
