

Pathway to a PhD in the Sciences - PART II

You Applied to Graduate School, NOW WHAT?

Submitting your graduate school applications is such a relief – but what comes next can be just as critical. Join us to find out the next steps to take once hitting that submit button!

This workshop will cover how to prep for grad school interviews, a detailed overview of how PhD programs work, including rotations, picking a PI, teaching assistantships vs. research assistantships, and what the comprehensive/qualification exams are all about.

The content for this workshop applies to students in the STEM and Biomedical Science fields, but anyone from any field is welcome to join.

Facilitated by:

Dr. Erin McCauley, Department of
Chemistry & Biochemistry
