

ETHOS - European Typology of Homelessness and housing exclusion

Homelessness is one of the main societal problems dealt with under the EU Social Protection and Inclusion Strategy. The prevention of homelessness or the re-housing of homeless people requires an understanding of the pathways and processes that lead there and hence a broad perception of the meaning of homelessness.

FEANTSA (European Federation of organisations working with the people who are homeless) has developed a typology of homelessness and housing exclusion called ETHOS.

The ETHOS typology begins with the conceptual understanding that there are three domains which constitute a "home", the absence of which can be taken

to delineate homelessness. Having a home can be understood as: having an adequate dwelling (or space) over which a person and his/her family can exercise exclusive possession (*physical domain*); being able to maintain privacy and enjoy relations (*social domain*) and having a legal title to occupation (*legal domain*). This leads to the 4 main concepts of Rooflessness, Houselessness, Insecure Housing and Inadequate Housing all of which can be taken to indicate the absence of a home. ETHOS therefore classifies people who are homeless according to their living or "home" situation. These conceptual categories are divided into 13 operational categories that can be used for different policy purposes such as mapping of the problem of homelessness, developing, monitoring and evaluating policies.
