

| Dataflow | Implication of Loop Order | Implication of Spatial Dimensions |
|---------------------|---|---|
| $\{M_s \ N_s\} K_t$ | Output (MN) stationary, Inputs (MK) and Weights (KN) stream every cycle | Spatial multicast of Inputs and Weights every cycle. Temporal reduction of partial sums within each PE. |
| $\{N_s \ K_s\} M_t$ | Weight (KN) stationary, Input (MK) streams every cycle | Spatial multicast of inputs every cycle. Spatial reduction of partial sums across PEs |
| $\{M_s \ K_s\} N_t$ | Input (MK) stationary, Weight (KN) streams every cycle | Spatial multicast of weights every cycle. Spatial reduction of partial sums across PEs |
