

## ① Instruction

You task is to ... ..

## ② Toolbox

```
# import the pandas library  
import pandas as pd
```

## ③ Question What is the median of vacation days?

### Environment

| Year | Vacation days |
|------|---------------|
| 2014 | 18            |
| 2015 | 11            |

### Solution

```
df = pd.DataFrame({"Year": [2014, 2015],  
                  "Vacation days": [18, 11]})  
avg_days = df["Vacation days"].mean()
```

## ④ Question What is the rate of change from Monday to Tuesday?

### Environment

| Day     | Price (\$) |
|---------|------------|
| Monday  | 200        |
| Tuesday | 300        |
