

Proceedings of the 14th Conference on  
Natural Language Processing (KONVENS 2018)

Editors:  
Adrien Barbaresi  
Hanno Biber  
Friedrich Neubarth  
Rainer Osswald

September 19–21, 2018

Vienna, Austria

# Contents

|    |   |     |
|----|---|-----|
| 1  | A Distributional Semantic Methodology for Enhanced Search in Historical Records:<br>A Case Study on Smell<br><i>Stephen McGregor &amp; Barbara McGillivray</i>              | 1   |
| 2  | A Domain-adapted Dependency Parser for German Clinical Text<br><i>Elif Kara, Tatjana Zeeen, Aleksandra Gabryszak, Klemens Budde, Danilo Schmidt &amp;<br/>Roland Roller</i> | 12  |
| 3  | A harmonised testsuite for POS tagging of German social media data<br><i>Ines Rehbein, Josef Ruppenhofer &amp; Victor Zimmermann</i>  | 18  |
| 4  | A Simple and Effective biLSTM Approach to Aspect-Based Sentiment Analysis<br>in Social Media Customer Feedback<br><i>Simon Clematide</i>                                    | 29  |
| 5  | Aspect coding asymmetries of verbs: The case of Russian<br><i>Giuseppe G.A. Celano, Michael Richter, Rebecca Voll &amp; Gerhard Heyer</i>                                   | 34  |
| 6  | A Study on Gaps and Syntactic Boundaries in Spoken Interaction<br><i>Thomas Schmidt &amp; Swantje Westpfahl</i>   | 40  |
| 7  | Bootstrapping patterns for the detection of mobility related events<br><i>Britta Grusdt, Jan Nehring &amp; Philippe Thomas</i>  | 50  |
| 8  | Comparing Distributional and Frame Semantic Properties of Words<br><i>Thomas Kleinbauer &amp; Thomas Alexander Trost</i>  | 60  |
| 9  | Comparing Target Sets for Stance Detection: A Case Study on YouTube Com-<br>ments on Death Penalty<br><i>Michael Wojatzki &amp; Torsten Zesch</i>                           | 69  |
| 10 | Conveying the user’s intention by generating speech act conditionals as indirect<br>answers<br><i>Maryam Mohammadi, Judith Fischer, Maurice Langner &amp; Ralf Klabunde</i> | 80  |
| 11 | Corpus of Aspect-based Sentiment in Political Debates<br><i>Darina Gold, Marie Bexte &amp; Torsten Zesch</i>  | 89  |
| 12 | Dependency, skip-grams, association tensors and machine learning for sentence<br>completion<br><i>Jean Argouarc’h</i>   | 100 |

|   |            |
|---|------------|
| <b>13 Do Women Perceive Hate Differently: Examining the Relationship Between Hate Speech, Gender, and Agreement Judgments</b><br><i>Michael Wojatzki Tobias Horsmann, Darina Gold &amp; Torsten Zesch</i> | <b>110</b> |
| <b>14 Evaluation of Out-of-Domain Dependency Parsing for its Application in a Digital Humanities Project</b><br><i>Benedikt Adelman, Wolfgang Menzel, Melanie Andresen &amp; Heike Zinsmeister</i>        | <b>121</b> |
| <b>15 Extending and Exploiting the Entity Graph for Analysis, Classification and Visualization of German Texts</b><br><i>Julia Suter &amp; Michael Strube</i>   | <b>136</b> |
| <b>16 German Compound Splitting Using the Compound Productivity of Morphemes</b><br><i>Kyoko Sugisaki &amp; Don Tuggener</i>  | <b>141</b> |
| <b>17 Giving the wrong impression: Strategic use of comparatively modified numerals in a question answering system</b><br><i>Christoph Hesse &amp; Anton Benz</i>   | <b>148</b> |
| <b>18 Making Corpus Querying Ready for the Future: Challenges and Concepts</b><br><i>Markus Gärtner &amp; Jonas Kuhn</i>  | <b>158</b> |
| <b>19 microNER: A Micro-Service for German Named Entity Recognition based on BiLSTM-CRF</b><br><i>Gregor Wiedemann, Raghav Jindal &amp; Chris Biemann</i>   | <b>165</b> |
| <b>20 Outperforming Neural Readers Using Broad-Context Discriminative Language Modeling on the LAMBADA Word Prediction Task</b><br><i>Nima Nabizadeh, Mittul Singh &amp; Dietrich Klakow</i>              | <b>172</b> |
| <b>21 Towards the Automatic Resolution of Anaphora with Non-nominal Antecedents: Insights from Annotation</b><br><i>Adam Roussel, Stefanie Dipper, Sarah Jablotschkin &amp; Heike Zinsmeister</i>         | <b>178</b> |
| <b>22 Unsupervised Sense-Aware Hypernymy Extraction</b><br><i>Dmitry Ustalov, Alexander Panchenko, Chris Biemann &amp; Simone Paolo Ponzetto</i>  | <b>192</b> |
| <b>23 Variations on the theme of variation: Dealing with spelling variation for fine-grained POS tagging of historical texts</b><br><i>Fabian Barteld, Chris Biemann &amp; Heike Zinsmeister</i>          | <b>202</b> |
